**Section 2
Local Area 911 Implementation**

List all individual local areas covered by this report (e.g., Lee County, Virginia):

See attached document

(a) For each area listed above, identify the emergency response point to which 911 calls will be routed.

See attach document – Page 4

(b) For each area listed above, provide details of the carrier's progress in completing translation and other work necessary to route 911 calls to the identified emergency response point.

See attached document page 4.

The carrier is currently working with Walthill, Winnebago, Macy and Rosalie Nebraska County officials to route 911 calls to the Thurston County seat. 911 will be a long distance call. Basically, the county has to agree to cover the costs.

(c) For each area listed above, provide the date or projected date that transition to the 911 abbreviated dialing code will be completed.

We expect to have the transition completed for the four communities by July 15, 2002

Section 3

911 Implementation Problems

(a) Describe any problems the reporting carrier has encountered in identifying 911 number call routing points. Describe any other operational problems carrier has experienced during the initial transition stages.

The public safety officials haven't been able to make a decision on how to route 911 calls to the Thurston County dispatch center.

(b) Where the reporting carrier has experienced 911 implementation problems, describe any efforts the carrier has made to coordinate with public safety agencies and state and local authorities.

We sent letters advising the public safety agencies of the transition program. We also met with County Officials to further explain the transition plan.
